Because this answer file is cached, when you run the Sysprep command, the system applies settings in the cached answer file. If you use the settings in a different answer file, you can specify a separate Unattend.xml file by using the Sysprep /unattend:<file\_name> option. For

# Get Free Sysprep With Answer File

more information, see Sysprep Command-Line Options. For more information about how to use an implicit answer-file search, see Windows Setup Automation Overview.

~~Use Answer Files with Sysprep |~~

~~Microsoft Docs~~

Sysprep processes any settings in the oobeSystem configuration pass in an answer file before OOBE starts.

/mode:vm. Generalizes a Virtual Hard Disk (VHD) so that you can deploy the VHD as a VHD on the same Virtual Machine (VM) or hypervisor. After the

## Get Free Sysprep With Answer File

VM restarts, the VM can boot to OOBE. For example: Sysprep /generalize /oobe /mode:vm

~~Sysprep Command Line Options | Microsoft Docs~~

You can either use Sysprep by itself or Sysprep with an unattend answer file

# Get Free Sysprep With Answer File

to generalize your image and make it ready for deployment. Generalize a Windows installation When you generalize a Windows image, Windows Setup processes settings in the generalize configuration pass.

~~Sysprep (Generalize) a Windows~~

# Get Free Sysprep With Answer File

~~installation | Microsoft Docs~~

One of the missing options of sysprep in my opinion is to just generalize an installation. Alternatives are to use third-party utilities to reset the computers ' SID, but since it ' s not an official solution, I will show you how to do it the ' official way ' by

# Get Free Sysprep With Answer File

using an answer file.

~~Windows Sysprep Image Without OOB~~  
~~With User~~

You can use an answer file together with the System Preparation (Sysprep) tool. It allows configuring unattended Windows Setup settings.

## Get Free Sysprep With Answer File

This step is optional (used to automatically specify various parameters that must be configured when the image is at first run). You can skip this step, and go straight to the step of capturing a Windows image.

~~Sysprep Windows 10 Machine: Step by Step Guide - TheITBros~~

Windows System Image Manager is the tool used to create an unattended Windows Setup answer file. Windows AFG, however, does not need the Windows Automated Installation Kit or Windows Assessment and

# Get Free Sysprep With Answer File

Deployment Kit to be installed or downloaded. Windows AFG provides a simple web based form that gives the user options to configure the desired answer file; which is all based off Windows SIM.

~~Windows Answer File Generator~~

## Get Free Sysprep With Answer File

Copy the answer file into the image into the `Windows/Panther` folder, and name it `unattend.xml`. The Panther folder is one of the folders where Windows searches for an answer file. Create the folder if it doesn't exist. If there's an existing answer file, replace it or use Windows

# Get Free Sysprep With Answer File

System Image Manager to edit/combine settings if necessary.

~~Answer files (unattend.xml) |~~

~~Microsoft Docs~~

One of the missing options of sysprep in my opinion is to just generalize an installation. Alternatives are to use

# Get Free Sysprep With Answer File

third-party utilities to reset the computers' SID, but since it's not an official solution, I will show you how to do it the 'official way' by using an answer file. The only two options available in the sysprep utility are:

~~Sysprep generalize Windows image~~

~~without OOB~~

Right click DiskConfiguration under Microsoft-Windows-Setup in the Answer File pane, then select Insert New Disk: Next, select the new disk in the Answer File pane, and edit its properties. DiskID tells Windows Setup which disk to use to install

# Get Free Sysprep With Answer File

Windows, where DiskID 0 is the primary hard disk (DiskID 1 = second HDD, and so on).

~~Windows 10 Unattended install media - Part 2: Answer file ...~~

An answer file is a set of instructions in an XML file. When sysprep is run, it

# Get Free Sysprep With Answer File

reads these instructions, what changes it should make to the Windows image. At first, we need to create a catalog file. For that, we need the install.wim file from a Windows install disk or ISO file.
