Mesopotamian Commentaries on the Diagnostic Handbook Sa-gig includes a cuneiform edition, English translation, and notes on medical lexicography for thirty Sa-gig commentary tablets and fragments, and represents a companion volume to Knowledge and Rhetoric in Medical Commentary (Brill, 2019).

Knowledge and Rhetoric in Medical Commentary explores the dynamic between scholastic rhetoric and medical knowledge in ancient commentaries on a Mesopotamian Diagnostic Handbook, whose atypical language and ideas were harmonized with conventional ways of perceiving and describing the sick body.

Part of the Oxford Textbooks in Clinical Neurology (OTCN) series, this volume covers the basic science and clinical concepts underlying the movement disorders, as well as the diagnosis and treatment of individual hypokinetic and hyperkinetic movement disorders.

Mesopotamian Medicine and Magic. Studies in Honour of Markham J. Geller offers 34 brand-new text editions and analytical studies concerned with diverse healing traditions and practices in Ancient Western Asia.

"Rigoberta Mench ú is a living legend, a young woman who said that her odyssey from a Mayan Indian village to revolutionary exile was " the story of all poor Guatemalans. " By turning herself into an ever"

For 25 years, Maxine Greene has been the philosopher-in-residence at the innovative Lincoln Center Institute, where her work forms the foundation of the Institute's aesthetic education practice. Each summer she addresses teachers from across the country, representing all grade levels, through LCI's intensive professional development sessions. Variations on a Blue Guitar contains a selection of these never-before-published lectures touching on the topics of aesthetic education, imagination and transformation, educational renewal and reform, excellence, standards, and cultural diversity, powerful ideas for today's educators.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Many books of the Hebrew Bible were either composed in some form or edited during the Exilic and post-Exilic periods among a community that was to identify itself as returning from Babylonian captivity. At the same time, a dearth of contemporary written evidence from Judah/Yehud and its environs renders any particular understanding of the process within its social, cultural and political context virtually impossible. This has led some to label the

period a dark age or black box – as obscure as it is essential for understanding the history of Judaism. In recent years, however, archaeologists and historians have stepped up their effort to look for and study material remains from the period and integrate the local history of Yehud, the return from Exile, and the restoration of Jerusalem ' s temple more firmly within the regional, and indeed global, developments of the time. At the same time, Assyriologists have also been introducing a wide range of cuneiform material that illuminates the economy, literary traditions, practices of literacy and the ideologies of the Babylonian host society – factors that affected those taken into Exile in variable, changing and multiple ways. This volume of essays seeks to exploit these various advances.

This book provides a comprehensive overview on Transcranial Direct Current Stimulation (tDCS) and the clinical applications of this promising technique. Separated into three parts, the book begins with basic principles, mechanisms and approaches of tDCS. This is followed by a step-by-step practicum, methodological considerations and ethics and professional conduct pertaining to this novel technique. Chapters are authored by renowned experts who also direct and plan tDCS educational events worldwide. Bridging the existing gap in instructional materials for tDCS while addressing growing interest in education in this field, professionals within a broad range of medical disciplines will find this text to be an invaluable guide.

Special 2018 Edition From the new Introduction by Janet L. Miller, Teachers College, Columbia University: "Maxine Greene never claimed to be a visionary thinker. But forty years later, her trepidations detailed throughout 1978's *Landscapes of Learning* now appear unnervingly prescient. Witness and treasure *Landscapes* as evidence of her matchless abilities to inspire myriad educators and students worldwide." " I would suggest that there must always be a place in teacher education for ' foundations ' people, whose fundamental concern is with opening new perspectives on the many faces of the human world. " —Maxine Greene The essays in this volume demonstrate clearly that Maxine Greene is herself an example of the kind of " foundations " specialist she hopes to see: someone who can stimulate, inform, and bring new insights to teachers, students, curriculum planners, administrators, policymakers—indeed all those concerned with education in its broadest sense. These essays, a number of them based on lectures presented to various professional organizations, reveals her dedication to learning and teaching, as it reveals her belief in the potential of each individual person. A philosopher whose orientation is largely existential and phenomenological, she seeks to demystify aspects of today ' s technological society, to question taken-for-granted notions of social justice and equality, and to elucidate conflicts between youth and age, the poor and the middle class, minorities and Whites, male and female. As a humanist, she calls for self-reflectiveness, wide-awakeness, and personal transformation within the context of each person ' s own lived world—each one ' s particular landscape of work, experience, and aspiration. Recognizing the multiple realities that compose experience, the many landscapes against which sense-making proceeds, the essays are grouped in four sections: intellectual and moral components of emancipatory education; social issues and their implications for approaches to pedagogy; artistic-aesthetic considerations in the making of curriculum; and the cultural significance of women ' s predicaments today. All are richly illuminated by examples; all are written with grace and passion; all will help readers achieve greater self-understanding and critical consciousness. " This is a significant book. " —Phi Delta Kappan " Maxine Greene forces us to consider what we can do even in a limited way and to begin to understand where we have failed. " —Cross Currents
