Un intero percorso di preparazione alla Certificazione Cisco CCNA #640-802 (versione 4), preparato da un docente esperto. Praticamente bilingue, con tutti i termini chiave sempre riportati in italiano e inglese e con gli acronimi solitamente affiancati dalla versione espansa", per maggior chiarezza. Ricco di esempi, spiegazioni, riferimenti, approfondimenti, tabelle riassuntive. Segnala anche le piccole sviste o i punti critici presenti, secondo l'autore, nel materiale originale in inglese. Strutturato a domande e risposte per facilitare l'apprendimento, dividendo la materia in "pillole" formative sui singoli argomenti. Approccio totalmente "top-down": le reti in generale, i protocolli (dal livello 7 al livello 2), le interfacce e i cablaggi (livello 1), gli apparati. Uno "zoom" sui Router, sugli Switch, sugli Access Point, sulla sicurezza ICT e sulle ACLAccess Control List. Comprende due accurate "Command Reference" dei comandi dei Router e degli Switch a livello CCNA (con alcune utili integrazioni), con i "prompt" e tutti i parametri commentati ed esemplificati. È il libro che può aiutare docenti e studenti che seguono i percorsi delle Cisco Academies, per incrociare, approfondire e integrare i materiali didattici online, e chi, più esperto, si affida alla modalità "self study"

Il volume traccia un percorso sulle tecnologie per le imprese italiane che vogliono far parte attiva della " rivoluzione digitale ". Il capitolo I, riguarda l ' impresa produttrice: cloud computing, stampa 3D e 4D, Internet delle cose, guida senza pilota, Impresa 4.0, comprese le misure di incentivazione. Il capitolo II, interfacchia l ' innovazione con la tutela: accanto al Patent Box ed ai " rimedi " alla contraffazione on line, si colloca, per es., la tracciabilità dei prodotti con codici QR. Il capitolo III, sposta l ' attenzione sulle tendenze per la riqualificazione innovativa della distribuzione commerciale: tagging, sistemi predittivi, mobile e social commerce. Il capitolo IV, tratta il tema della logistica. La consegna dei prodotti alimentari appare l " ultimo miglio " del commercio elettronico, per cui si descrivono come funzionano (e costano) i modelli di consegna utilizzati in Italia dai principali operatori (Esselunga, Amazon, etc.). Infine, il capitolo V, concerne i pagamenti su Internet: dalle carte di credito on line e virtuali, alle monete elettroniche (compreso il Bitcoin), ai pagamenti con smartphone e tablet e tecnologie Rfid e NFC, fino al riconoscimento biometrico con i selfie.

These official study guides help you master all the topics on the CCNA exams, including - Network fundamentals - Implementing basic Ethernet LANs - Ethernet LANs: design, VLANs, and troubleshooting - IPv4 addressing and subnetting - Implementing IPv4 - IPv4 design and troubleshooting - IPv4 services: ACLs, NAT, and QoS - IPv4 routing protocols and routing - Wide area networks - IPv6 - Network management, SDN, and cloud computing

Direct from Cisco, this comprehensive book guides networking professionals through all aspects of planning, implementing, and operating Cisco Software Defined Access, helping them use intent-based networking, SD-Access, Cisco ISE, and Cisco DNA Center to harden campus network security and simplify its management. Drawing on their unsurpassed experience architecting SD-Access solutions and training technical professionals inside and outside Cisco, the authors cover all facets of the product: its relevance, value, and use cases; its components and inner workings; planning and deployment; and day-to-day administration, support, and troubleshooting. Case studies demonstrate the use of Cisco SD-Access components to address Secure Segmentation, Plug and Play, Software Image Management (SWIM), Host Mobility, and more. Building on core concepts and techniques, the authors present full chapters on advanced SD-Access and Cisco DNA Center topics, as well as detailed coverage of fabric assurance.

Networking means to create nets of relations, where the publisher and the reader, the artist and the audience, act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy, through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies, from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information, disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet, during the past twenty years a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker, operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s (first and foremost Fluxus), but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the 1980s even before the Internet even existed, and then moved on to Hackmeetings, to Telestreet and networking art by different artists such as 0100101110101101.ORG, [epidemic], Jaromil, Giacomo Verde, Giovanotti Mondani Meccanici, Correnti Magnetiche, Candida TV, Tommaso Tozzi, Federico Bucalossi, Massimo Contrasto, Mariano Equizzi, Pigreca, Mollindustria, Guerriglia Marketing, Sexyshock, Pnag Off and many others.
