This system is known as the Switching System or the Switching Office or the Exchange. With the introduction of the switching system, the subscribers instead of getting connected directly to one another, are connected to a switching office and then to the required subscriber. The following figure will help you understand the switching system.

TSSN - Introduction - Tutorialspoint

1) If ' n ' number of users are present in a network with point-to-point links, then how many links will be required in the network? a. $n(n - 1)$ b. $n(n - 1) / 2$ c. $n(n - 1) / 4$ d. n
