from your bot users and send them replies.

## **GitHub - mast/telegram-bot-api: First Telegram Bot API ...**

The first step in creating a Telegram bot is setting up the profile that the bot will ultimately stand behind. This is also how you get a token for the Telegram API. To set up a new bot profile, log in to your Telegram account and start a conversation with the BotFather (@BotFather), an official account that allows you to create and manage bots.
