This book highlights research that contributes to a better understanding of emerging challenges in information systems (IS) outsourcing. Important topics covered include: how to digitally innovate through IS outsourcing; how to govern outsourced digitalization projects; how to cope with complex multi-vendor and micro-services arrangements; how to manage data sourcing and data partnerships, including issues of cybersecurity; and how to cope with the increasing demands of internationalization and new sourcing models, such as crowdsourcing, cloud sourcing and robotic process automation. These issues are approached from the client's perspective, vendor's perspective, or both. Given its scope, the book will be of interest to all researchers and students in the fields of Information Systems, Management, and Organization, as well as corporate executives and professionals seeking a more profound analysis of the underlying factors and mechanisms of outsourcing.

International Financial Statistics , March 2017

Deals with the convergence of business and IT in the Islamic finance industry. This work contains information on the fundamentals of Islamic finance. It is suitable for professionals working in the Islamic Finance and crossovers.

As the largest economy in the EAC and COMESA in terms of GDP, Kenya has positioned itself as a major economic power in sub-Saharan Africa.

Traditionally a largely agrarian economy, Kenya has quickly entrenched its position as a manufacturing, logistics and technology hub in the region, and this diversification forms a solid platform from which the government can generate economic growth over the coming years. The resolution of the electoral process, improving business confidence and strong private consumption are likely to support GDP expansion over 2018 and into 2019. In April 2018 the IMF estimated the economy would expand by 5.5% in 2018 and 6% in 2019, compared to 4.8% in 2017.

This paper outlines the IMF's principal statistical publication, International Financial Statistics (IFS), has been published monthly since January 1948. In 1961, the monthly was supplemented by a yearbook, and in 1991 and 2000, respectively, IFS was introduced on CD-ROM and the Internet. IFS contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community (CEMAC), Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union (ECCU), the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union (WAEMU), West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. Also, selected series are drawn from the country tables and published in area and world tables. The monthly printed issue of IFS reports current monthly, quarterly, and annual data, while the yearbook reports 12 observations of annual data. Most annual data on the CD-ROM and Internet begin in 1948; quarterly and monthly data generally begin in 1957; most balance of payments data begin in 1970.

This paper discusses Liberia's Fifth and Sixth Reviews Under the Extended Credit Facility (ECF) Arrangement, Request for Waivers of Nonobservance of Performance Criteria, Augmentation of Access, and Extension of the Arrangement. Two end-December 2015 and three end-June performance criteria were missed. Two out of nine structural benchmarks for the fifth review were met, while three were completed late. Three out of five structural benchmarks for the sixth review were met. The IMF staff supports the completion of the fifth and sixth reviews and the authorities' requests for waivers of nonobservance of performance criteria, augmentation of ECF access, and extension of the ECF arrangement.

Deals with the convergence of business and IT in the retail banking industry. This work aims to introduce the concepts of retail banking from a global perspective. This book covers topics including: an overview of the major retail banking products; payments and lending practices in different continents; and, IT projects in retail banking.

This paper explores the country tables normally include data on a country's exchange rates, IMF position, international liquidity, monetary statistics, interest rates, prices, production, labor, international transactions, government accounts, national accounts,

and population. The International Financial Statistics (IFS) contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community (CEMAC), Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union (ECCU), the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union (WAEMU), West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. Also, selected series are drawn from the country tables and published in area and world tables. Selected series, including data on IMF accounts, international reserves, and international trade, are drawn from the country tables and published in world tables as well.

The Temenos T24 core banking application is a critical application for the banks that use it and has a primary focus on providing an appropriate level of high availability and disaster recovery. The level of availability is determined largely by the configuration of the infrastructure that supports T24. This infrastructure is built on hardware, middleware, and networking, in addition to the operational procedures and practices that are used to operate T24. Many options are available for meeting a client's high availability and disaster recovery requirements. The solution chosen by a Temenos T24 user depends on many factors. These factors include a user's detailed availability and recovery requirements; their existing datacenter standards, practices, and processes; and the available network infrastructure. Therefore, the optimum solution must be determined on a case-by-case basis for each deployment. This IBM® Redpaper™ publication serves as a guide to help IT architects and other technical staff who are designing, configuring, and building the infrastructure to support Temenos T24. It shows how IBM software can deliver high availability and disaster recovery for Temenos T24 to meet a client's requirements. This software might run on IBM AIX®, IBM WebSphere® Application Server, WebSphere MQ Server, and IBM DB2®. These IBM software components are typically used for a Temenos T24 deployment on an IBM middleware stack to ensure a highly available infrastructure for T24.
