Euclid defines the
"extreme and mean
ratio," or "Divine

Proportion," as the
following relationship:
When a line is divided
such that the smaller
section of the line
(BC) is related to the
larger section of the
line (AC) in the same
ratio as the larger
section is related to

Download File PDF The Divine

the whole line (AC),
then the line is divided
in the Divine
Proportion.

Golden ratio, also known as the golden section, golden mean, or divine proportion, in mathematics, the irrational number $(1 + \sqrt{5})/2$, often denoted by the Greek letter ϕ or Φ , which is approximately equal to 1.618. It is the ratio of a line segment cut into two pieces of

Download File PDF The Divine

different lengths such that the ratio of the whole segment to that of the longer segment is equal to the ratio of the longer segment to the shorter segment.
