27 reviews of The Green Solution Recreational Marijuana Dispensary "I love this place it's always so clean and the staff is always friendly especially Malcolm. He was so helpful and let me know all the deals and was very knowledgeable about the products. I love when I can ask a question and my rep can actually answer me about what things are and Malcolm definitely has that down!"

About The Green Solution Since its inception in 2010 as one of the first cannabis companies in Colorado, The Green Solution ( " TGS " ) has grown exponentially into one of the top vertically integrated cannabis operators in Colorado.

This unique, research-based investigation of the U.S. breast cancer movement compares the "pink" and "green" efforts within the movement and documents their use of similar citizen-science alliances, despite the contention over the use of consumer-based activism and pink products. • Examines research findings that suggest that the pink and green aspects of the breast cancer movement are no longer separate but in fact are converging towards a focus on environmental prevention • Provides an in-depth examination of advocacy organizations and the ways in which an organization's structure and ideology shape its agenda and strategies • Looks critically at controversial aspects of the consumerism of the pink movement, the small portion of sales actually given to cancer research, and other shortcomings of this attempt to shop our way out of a nonetheless still-increasing disease • Presents valuable information for upper level undergraduate and graduate students in political science within American politics or health politics courses as well as those studying women's and gender studies, sociology, nursing, and non-profit enterprises

The integration of technology in education has provided tremendous opportunity for learners of all ages. In today's technology-focused society, the traditional classroom setting is being transformed through online learning platforms, collaborative and experimental methods, and digital educational resources that go hand-in-hand with non-digital learning devices. The Handbook of Research on Applied E-Learning in Engineering and Architecture Education reviews the latest research available on the implementation of digital tools and platforms within the framework of technical education, specifically in the subjects of architecture and engineering. Taking a global approach to the topic of online learning environments for technical education at all grade levels, this comprehensive reference work is ideally designed for use by educators, instructional designers, and researchers from around the world. This handbook contains pertinent research on a variety of educational topics including online learning platforms, mobile and blended learning, collaborative learning environments, gaming in education, informal learning, and educational assessment.

Businesses promote their environmental awareness through green buildings, eco-labels, sustainability reports, industry pledges and clean technologies. When are these symbols wasteful corporate spin, and when do they signal authentic environmental improvements? Based on twenty years of research, three rich case studies, a strong theoretical model and a range of practical applications, this book provides the first systematic analysis of the drivers and consequences of symbolic corporate environmentalism. It addresses the indirect cost of companies' symbolic actions and develops a new concept of the 'social energy penalty' - the cost to society when powerful corporate actors limit the social conversation on environmental problems and their solutions. This thoughtful book develops a set of tools for researchers, regulators and managers to separate useful environmental information from empty corporate spin, and will appeal to researchers and students of corporate responsibility, corporate environmental strategy and sustainable business, as well as environmental practitioners.

Republished in a new translation, The Green Book provides fresh insight into the thinking of Muammar Al Gathafi and his Third Universal Theory for a new democratic society. Outlined first is his theory for direct democracy in society, or Jamahiriya, focussing on the authority of the people, renouncing representation or delegation of authority and recognizing the need for popular organization at lower levels of society. Part Two suggests an economic revolution, transforming societies of wage earners into companies of partners by applying a political and economic theory of social organization that gives the ownership and regulation of production, distribution and exchange to the community as a whole. Part Three launches a social revolution, presenting solutions to man's struggles in life and the unsolved problems of man and woman, as well as tackling the situation of minorities by laying out sound principles of social life for all man kind.
