The Long Earth is the first book in a five-book science fiction series by Terry Pratchett and Stephen Baxter. The main premise is that humans have discovered that it's possible to "step" to a seemingly-unlimited number of alternate earths, all of which appear to be pristine wildernesses with no humans to be found.

**The Long Earth (The Long Earth, #1) by Terry Pratchett**

An unmissable milestone for fans of Sir Terry Pratchett: the first SF novel in over three decades in which the visionary inventor of Discworld has created a new universe of tantalizing possibilities—a series of parallel "Earths" with doorways leading to adventure, intrigue, excitement, and an escape into the furthest reaches of the imagination.

The "Long Earth" is a (possibly infinite) series of parallel worlds that are similar to Earth, which can be reached by using an inexpensive device called a "Stepper". The "close" worlds are almost identical to "our" Earth (referred to as "Datum Earth"), others differ in greater and greater details, but all share one similarity: on none are there, or have there ever been, Homo sapiens – although the same cannot be said of earlier hominid species, especially Homo habilis .
