This book uses a Kafkaesque lens to study the public and legal features of the coverage of the Nisour Square shootings of 2007. It illustrates how most American communities were much more interested in regulating private security firms than they were in having legal discussions of potential war crimes.

Globalization is tearing at the fabric of American society. Locked in a high-stakes struggle and on the verge of a trade war, the United States and China each want a piece of the action—and both countries will do just about anything to ensure success. But when a union boss is murdered while leading a strike against sending American jobs offshore, everything begins to change, especially for John Shay. John, a union leader at a stale point in his marriage and at work, takes over the strike along with his chosen partner, Hannah Stein, a tough negotiator who loves to be on the line with strikers, but who is also battling complicated personal demons. Aided by Chinese activists and a Native American woman working in Asia to combat digital piracy, the two partners soon realize the strike is just a piece on a much larger game board. As Hannah and John stumble into a thicket of intrigue, mounting unrest spills into the streets of China and the United States. In this intense thriller, two union leaders unwittingly snared in a geopolitical drama between two heavyweight nations are determined to fight for the American working class, even if it means putting their own lives on the line.
