Students and social workers preparing for the social work Masters licensure exam will find an invaluable study resource in the Social Work ASWB® Masters Exam Guide. Written by a prominent social work leader and trainer for social work licensing exams in the U.S., the guide is based on years of time-tested exam prep workshops conducted by the author. The 170-question practice test at the end of the guide (with explanations of the correct answers) mirrors the actual exam in both length and structure.

Response to Intervention (RtI) is at the heart of evidence-based practice in schools. Though written into federal special education legislation, it is a general education process consisting of a three-tiered framework for organizing a comprehensive and differentiated system designed to ensure educational success for all students. The focus in this book is on meeting the social, emotional, and behavioral needs of students. School social workers are key stakeholders who need to be skilled in designing, monitoring, and evaluating the effectiveness of school-wide universal supports, targeted group interventions, and intensive individual interventions in objective and measurable terms. Designed as both a training manual and a practical reference, with contributions by seasoned academics and practitioners with extensive experience developing and practicing in RtI systems, this one-of-a-kind guide operationalizes this crucial service delivery framework. It highlights the importance of data-based decision making and offers concrete guidelines for collecting, analyzing, and displaying data. Detailed case examples that illustrate real-world program implementation, practical guidance in selecting empirically supported practices, sample assessment worksheets, and strategies for supporting the adoption and sustainability of RtI systems make this a handy tool for school social

workers seeking a more active role in using decision-making processes to improve their school's system of support for all students.

The Social Worker's Guide to Child and Adolescent Mental Health provides a comprehensive guide to working with children and young people who are experiencing mental health problems, and equips the reader with the knowledge and skills to provide the best service to these vulnerable young people. The first part of the book considers what role social work can play in child and adolescent mental health, and explores key ideas related to mental health and young people, including attachment issues, children's emotional development and common and complex mental health problems. The author then covers how social work skills and methods can be applied to working with children and young people with mental health problems, including guidance on assessment tools, intervention, and multi-disciplinary working. The final section focuses on the wider context, such as legislative and policy frameworks and the importance of considering cultural, spiritual and religious identity. Case examples, reflective activities and practical exercises are included to underpin theory and knowledge. This book will be essential reading for all pre- and post-qualifying social work practitioners involved with children, adolescents and families, in particular those working in mental health settings, as well as approved mental health professionals.
