author, Joy Gendusa, was the entrepreneur that brought postcard marketing to the masses by cutting out the middle men (ad agencies), and making it affordable for businesses of all sizes. Now in its third printing, *Postcard Marketing In An Online World* has evolved into so much more. With the rise of internet marketing technology, Joy took the time to test how these new technologies worked best with traditional mediums like direct mail. The result is a proven method for integrating direct mail with the latest technological marketing advances, and getting the absolute best results. In this book, you will learn: How to build an effective direct mail postcard campaign that produces consistent returns How to integrate your postcard campaign with other

approaches allow for dynamic application adaptation as well as integration of enterprise application. Commonly used technologies, such as J2EE and .NET, form de facto standards for the realization of complex distributed systems. Evolution of component systems has lead to web services and service-based architectures. This has been manifested in a multitude of industry standards and initiatives such as XML, WSDL UDDI, SOAP, etc. All these achievements lead to a new and promising paradigm in IT systems engineering which proposes to design complex software solutions as collaboration of contractually defined software services. Service-Oriented Systems Engineering represents a symbiosis of best practices in object-orientation, component-based
