The ambulatory neurology rotation is designed to provide the resident with exposure to both general neurology as well as subspecialty neurology in outpatients. The resident on the ambulatory rotation provides care to patients in the various specialty clinics, including: epilepsy, neuromuscular disease, memory disorders, movement disorders, neuro-ophthalmology, multiple sclerosis, sleep, and a lumbar puncture clinic.

Rotations Schedule / Neurology

Clinical neurology is the diagnosis and treatment of patients who have neurological conditions. It is a non-surgical, patient-oriented specialty practice in medicine. There are certainly neurologists who might participate in research or teaching and don't have much contact with patients. In these cases, these doctors would not be practicing clinical neurology, since clinical tends to be defined as having to do with patient care.
