A Level Edexcel Notes

Sexual reproduction involves the development and fusion of haploid gametes. Nature of science: Assessing risks and benefits associated with scientific research—the risks to human male fertility were not adequately assessed before steroids related to progesterone and estrogen were released into the environment as a result of the use of the female contraceptive pill.

Topic 11.4: Sexual Reproduction - AMAZING WORLD OF SCIENCE ...

General features Reproduction and development. In multicellular animals (Metazoa), reproduction takes one of two essentially different forms: sexual and asexual. In asexual reproduction the new individual is derived from a blastema, a group of cells from the parent body, sometimes, as in Hydra and other coelenterates, in the form of a "bud" on the body surface.
