Check the spark plug itself. The bottom should be wet with fuel. If it's not, it's probably not getting fuel. If it is wet and the mower still won't start, you may need a new spark plug. Be sure to use the correct replacement for your engine model. For a mower with an electric starter, also check to make sure the battery is fully charged.

Clogged Air Filter. The air filter is the first thing you'll want to check when looking to fix your surging mower. If it's dirty, it starves the mower engine of the oxygen required for combustion. Solution: Depending on the type of filter, you can clean or replace it. First, disconnect the spark plug wire.

~~4 Things to Troubleshoot in a Lawn Mower For Surging Engine~~

The air imbalance also compromises the vacuum needed to move fuel, air and the fuel and air mixture through the carburetor. Check the gasket, tighten the bolts and inspect the air-intake manifold for leaks. Tighten bolts or replace worn parts as needed to correct any problems that arise during troubleshooting.

~~How to Troubleshoot Surging Lawn Mower Engines | Hunker~~

If the engine in emitting black smoke, this could mean that the air filter is dirty, the fuel could have gone bad, and/or the carburetor is flooded. Start by checking your air filter, if it looks okay, move onto replacing the gas. If the problem continues, refer to the following for cleaning/replacing your Carburetor.

Purchased Toro 75740 mower from Toro site. Toro-Exmark credit card said 36 months no interest. Mower was geared way too fast for my lot. When I tried to return it to the delivering dealer (who was great) they said since I used it (1 mow, 1 1/2 hrs run time) and bought it online Toro would make them eat it and could not accept a return.

~~97 Toro Reviews and Complaints & Pissed Consumer~~

The Starter Rope is Hard to Pull or Seems Stuck: A typical cause for this is that the engine flywheel brake (the bar you hold down on the handle that stops the engine when released) is engaged. Be sure to bring the bar down all the way to the handle before pulling.

~~Top 5 Mower Troubleshooting Tips | Briggs & Stratton~~

For this test you will need a can of carburetor cleaner. Have a helper hold the bail lever, so the mower stays running. To test, simply spray the carb cleaner around the carburetor gasket joints (where the carb connects with the engine). Listen for an increase in engine idle speed - this indicates a vacuum leak.
