Seven stunning stories of speculative fiction by the author of *A Boy and His Dog*. In a post-apocalyptic world, four men and one woman are all that remain of the human race, brought to near extinction by an artificial intelligence. Programmed to wage war on behalf of its creators, the AI became self-aware and turned against humanity. The five survivors are prisoners, kept alive and subjected to brutal torture by the hateful and sadistic machine in an endless cycle of violence. This story and six more groundbreaking and inventive tales that probe the depths of mortal experience prove why *Grand Master of*

innovative text delivers an apt and comprehensive introduction to the rich and complex world of animal behaviour and cognition. Discover pivotal case studies and experiments that have irrevocably shaped how we view the psychological and social lives of animals and discover such key cognitive topics as memory, communication and sensory perception. Projecting an insightful scope into the cognitive world of animals, from considering the use of tools in birds to the dance communication system of the honey bee, Wynne and Udell analyse and explain the importance of the observations and studies that have led to the greater understanding of how animals learn, perceive social relations, form concepts, experience time and navigate space. Written by two leading researchers in the field, including the author of the best-selling popular science book *Dog is Love*,

this textbook is a complete resource for students of animal cognition, animal behaviour or comparative psychology.

A new advanced textbook/reference providing a comprehensive survey of hardware and software architectural principles and methods of computer systems organization and design. The book is suitable for a first course in computer organization. The style is similar to that of the author's book on assembly language in that it strongly supports self-study by students. This organization facilitates compressed presentation of material. Emphasis is also placed on related concepts to practical designs/chips. Topics: material presentation suitable for
