In addition, the book investigates whether the current United Arab Emirates FIU model complies with the relevant international recommendations developed by the Financial Action Task Force in relation to the establishment of the unit, as well as its powers and functions. Here Professor Curley undertakes to show how the central claims of the Ethics arose out of critical reflection on the philosophies of Spinoza's two great predecessors, Descartes and Hobbes. The second book, whose argument is conducted in the notes to the text, attempts to support further the often controversial interpretations offered in the text and to carry on a dialogue with recent commentators on Spinoza. The author aligns himself with those who interpret Spinoza naturalistically and materialistically.
