Using Data To Guide Instruction

Using student growth data to inform instruction can be a valuable and efficient tool for driving students' academic gains. When you make data actionable, you make assessment matter. To fully benefit from assessment, students and teachers need to use the data to invoke meaningful change.

Three Ways to Put Assessment Data to Work in the Classroom

Data-driven educational decision making refers to the process by which educators examine assessment data to identify student strengths and deficiencies and apply those findings to their practice. This process of critically examining curriculum and instructional practices relative to students' actual performance on standardized tests and other assessments yields data that help teachers make more accurately informed instructional decisions (Mertler, 2007; Mertler & Zachel, 2006).
