Mr. Stimson led the firm through its initial growth and established it as a leading provider to startups and small companies in the New England region. After QLFS, Mr. Stimson launched Trucking Capital LLC to provide services in the USA, Canada and Australia. Under his leadership, Trucking Capital LLC has expanded to offer a number of business finance products and can help companies in most industries. Trucking Capital LLC is one of the few companies that offers micro-factoring (also called small-ticket factoring), which helps early-stage companies with limited revenues. Small business factoring has been ignored by larger factoring firms and banks, establishing Mr. Terry as a pioneer in this market. Before starting his career in finance, Mr. Stimson held several management positions in operations and marketing in the telecommunications industry for eight years. He earned a Master ' s Degree in Finance with a concentration in banking. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

Intuitive Probability and Random Processes using MATLAB® is an introduction to probability and random processes that merges theory with practice. Based on the author ' s belief that only "hands-on" experience with the material can promote intuitive understanding, the approach is to motivate the need for theory using MATLAB examples, followed by theory and analysis, and finally descriptions of "real-world" examples to acquaint the reader with a wide variety of applications. The latter is intended to answer the usual question "Why do we have to study this?" Other salient features are: "heavy reliance on computer simulation for illustration and student exercises "the incorporation of MATLAB programs and code segments "discussion of discrete random variables followed by continuous random variables to minimize confusion "summary sections at the beginning of each chapter "in-line equation explanations "warnings on common errors and pitfalls "over 750 problems designed to help the reader assimilate and extend the concepts Intuitive Probability and Random Processes using MATLAB® is intended for undergraduate and first-year graduate students in engineering. The practicing engineer as well as others having the appropriate mathematical background will also benefit from this book. About the Author Steven M. Kay is a Professor of Electrical Engineering at the University of Rhode Island and a leading expert in signal processing. He has received the Education Award "for outstanding contributions in education and in writing scholarly books and texts..." from the IEEE Signal Processing society and has been listed as among the 250 most cited researchers in the world in engineering.

This volume is the result of collaboration between SPMA and the Association des archeologues du Quebec (AAQ); its guest editor is William Moss, Chief Archaeologist for the City of Quebec. The publication has arisen from the celebration of the 400th anniversary of the city's founding by Samuel de Champlain in 1608, an occasion which gave momentum to a number of important archaeological projects in the city and surrounding region, and provided an excellent opportunity to present their results. It contains sixteen papers, all translated from French, the language of Quebec City. They include accounts of exciting discoveries relating to the port, the great chateau on the crag above it, the defences, and the newly discovered remains of the short-lived colony of the 1540s. The papers underline Quebec's status as one of the leading centres of urban research in North America. The volume provides the only modern overview of archaeological work in the city in the English language.

How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards; Recognize that the decision to adopt standards is made independently by the NWCWG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCWG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCWG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The "NWCWG Standards for Interagency Incident Business Management" assists participating agencies of the NWCWG to constructively work together to provide effective execution of each agency's incident business management program by establishing procedures for: - Uniform application of regulations on the use of human resources, including classification, payroll, commissary, injury compensation, and travel. - Acquisition of necessary equipment and supplies from appropriate sources in accordance with applicable procurement regulations. - Management and tracking of government property. - Financial coordination with the jurisdictional agency and maintenance of finance, property, procurement, and personnel records, and forms. - Use and coordination of incident business management functions as they relate to sharing of resources among federal, state, and local agencies, including the military. - Documentation and reporting of claims. - Documentation of costs and cost management practices. - Administrative processes for all-hazards incidents.
