According to public health officials, obesity poses significant health risks and has become a modern-day epidemic. A closer look at this so-called epidemic, however, suggests that there are multiple perspectives on the fat body, not all of which view obesity as a health hazard. Alongside public health officials at the Centers for Disease Control and Prevention are advertisers of the fashion-beauty complex, food industry advocates at the Center for Consumer Freedom, and activists at the National Association to Advance Fat Acceptance. Framing Fat takes a bird 's-eye view of how these multiple actors construct the fat body by identifying the messages these groups put forth, particularly where issues of beauty, health, choice and responsibility, and social justice are concerned. Samantha Kwan and Jennifer Graves examine how laypersons respond to these conflicting messages and illustrate the gendered, raced, and classed implications within them. In doing so, they shed light on how dominant ideas about body fat have led to the moral indictment of body nonconformists, essentially " framing " them for their fat bodies.

內容簡介 自1995年以來，越南積極加入東協、APEC、WTO等區域及國際經貿組織，開放經濟外交帶動越南經濟數年來持續增長，2001至2010年越南平均經濟成長率達7.3%。然而，高通貨膨脹率、基礎建設落後、人力成本增高及國有企業行政效率低落等問題，致使投資熱潮退燒，並拖累整體經濟表現，2011年經濟成長率僅達5.9%。為維持經濟穩定成長，越南政府將2015年國家發展主要目標設為「穩定通膨」、「降低入超」、「提高人力素質」及「改善國有企業行政效率」等項目。本文將以政治環境、經濟環境、社會環境及科技環境等構面來分析越南整體環境的近況及變化，以提供給有意進軍越南的廠商做為參考之用。

This authoritative and comprehensive handbook is the definitive work on the current state of the art of Biometric Presentation Attack Detection (PAD) – also

known as Biometric Anti-Spoofing. Building on the success of the previous, pioneering edition, this thoroughly updated second edition has been considerably expanded to provide even greater coverage of PAD methods, spanning biometrics systems based on face, fingerprint, iris, voice, vein, and signature recognition. New material is also included on major PAD competitions, important databases for research, and on the impact of recent international legislation. Valuable insights are supplied by a selection of leading experts in the field, complete with results from reproducible research, supported by source code and further information available at an associated website. Topics and features: reviews the latest developments in PAD for fingerprint biometrics, covering optical coherence tomography (OCT) technology, and issues of interoperability; examines methods for PAD in iris recognition systems, and the application of stimulated pupillary light reflex for this purpose; discusses advancements in PAD methods for face recognition-based biometrics, such as research on 3D facial masks and remote photoplethysmography (rPPG); presents a survey of PAD for automatic speaker recognition (ASV), including the use of convolutional neural networks (CNNs), and an overview of relevant databases; describes the results yielded by key competitions on fingerprint liveness detection, iris liveness detection, and software-based face anti-spoofing; provides analyses of PAD in fingervein recognition, online handwritten signature verification, and in biometric technologies on mobile devices includes coverage of international standards, the E.U. PSDII and GDPR directives, and on different perspectives on presentation attack evaluation. This text/reference is essential reading for anyone involved in biometric identity verification, be they students, researchers, practitioners, engineers, or technology consultants. Those new to the field will also benefit from a number of introductory chapters, outlining the basics for the most important biometrics.
