The British School of Watchmaking is an independent institution which looks for students with the ability, aptitude and desire to become the exceptional watchmakers the modern market requires.

*British School of Watchmaking - Watchmaking School*

A watchmaker is an artisan who makes and repairs watches. Since a majority of watches are now factory made, most modern watchmakers only repair watches. However, originally they were master craftsmen who built watches, including all their parts, by hand.

Watchmaking, written by Daniels and first published in 1981, remains one of the most definitive books on horology. It was the first of another six books, some of which have been translated and published in French, Italian and German, that remain in print. Watchmaking, now in its third edition, was revised and reprinted in 1999.

### *r/watchmaking - reddit*

In the 16th century Europeans began to craft watches by hand; a tradition that thrived until the mechanization of the 20th century replaced the individual watchmaker with mass production. Hand methods were further eclipsed by the advent of the electronic watch in the 1960s, and many people feared that the mechanical watch would disappear entirely.
