4TNV88-BDSA | Yanmar USA

The Yanmar injector pump delivers precisely metered and timed bursts of fuel to the fuel injectors via the injector lines. Fuel is delivered to the injector pump by a low pressure feed pump (lift pump). The injector pump draws fuel from the feed supply and distributes high pressure fuel to the injectors and the spill circuit.

YANMAR 3TNV88F SERVICE MANUAL Pdf Download | ManualsLib

Loosening the fuel connection on a faulty injector will have no effect on the engine running because it will continue running on the good injector, but loosening the fuel fitting on a good injector will kill the engine. Now, if you switch the injectors and there is no change in which cylinder continues to run, the high pressure pump is faulty. It would be worthwhile at that point to have the ...
