Code Optimization Handout written by Maggie Johnson.

Optimization is the process of transforming a piece of code to make more efficient (either in terms of time or space) without changing its output or side-effects. The only difference visible to the code's user should be that it runs faster and/or consumes less memory.

Michael Abrash is a software executive, programmer and technical writer specializing in code optimization and 80x86 assembly language, a reputation cemented by his 1990 book *Zen of Assembly Language Volume 1: Knowledge* and a monthly column in *Dr. Dobbs' Journal* in the early 1990s. A later book, *Zen of Graphics Programming*, applied these ideas to 2D and 3D graphics prior to the advent of hardware accelerators for the PC. Though not strictly a game programmer, Abrash has worked on the underlying t
